Professional Summary

Computer Science graduate and Backend Engineer specializing in Java and the Spring ecosystem, with hands-on experience building scalable microservices and clean, maintainable RESTful APIs. Skilled in designing production-grade distributed systems using clean architecture principles, SOLID design practices, and secure backend solutions. Passionate about building reliable, high-performance applications with strong focus on scalability, fault tolerance, and comprehensive testing.

Technical Skills

Languages & Core : Java, OOP, SOLID Principles, Design Patterns, Clean Architecture, Data Structures & Algorithms

Frameworks: Spring Boot, Spring Data JPA, Spring Security, Hibernate

Backend & APIs: REST APIs, Bean Validation, Global Exception Handling, DTO Mapping, API Design, Swagger/OpenAPI

Microservices & Distributed Systems: Spring Cloud Gateway, Eureka, Config Server, OpenFeign, Resilience4j (Circuit Breaker, Rate Limiter, Retry), Saga Pattern, Event-Driven Architecture

Messaging & Real-Time Communication: Apache Kafka (Producers/Consumers/Topics, Event Sourcing), WebSocket, Asynchronous Communication

Security: JWT Authentication, OAuth2, Role-Based Access Control (RBAC), Spring Authorization Server

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis (Caching & Pub/Sub)

DevOps & Tools: Docker, Docker Compose, GitHub Actions CI/CD, Zipkin Distributed Tracing, Micrometer, Maven

Projects

Bank CIF and TPIN management system  04/2026 – 05/2026

Description: A secure REST API built with Spring Boot 4.0.6 and Java 21 for managing Bank Customer Information Files (CIF) and Transaction PINs (TPIN).

Technologies: Java, Spring Boot, Spring Security, Spring Data JPA, H2 Database, JWT, BCrypt, Swagger, Lombok

Smart Queue System  03/2026 – 04/2026

Description: A production-grade, event-driven microservices platform that solves a real-world problem in Egypt — eliminating long physical queues in hospitals, government offices, and service centers. Built with Java 21, Spring Boot 4, and modern Cloud-Native principles.

Technologies: Java 21, Spring Boot, Spring Cloud (Gateway, Eureka, Config Server), Spring Security, Spring Data JPA, PostgreSQL, Apache Kafka, WebSocket, Redis, OpenFeign, JWT, OAuth2, Resilience4j, Docker, Zipkin, Micrometer.

FreelanceHub Platform  02/2026 – 03/2026

Description: Designed and implemented a production-grade, event-driven microservices freelancing platform with distributed architecture, API Gateway, service discovery, and Saga-based transaction management

Technologies: Java 21, Spring Boot 3, Spring Cloud, Spring Security, Spring Data JPA, PostgreSQL, Apache Kafka, Redis, OpenFeign, JWT, OAuth2, Resilience4j, Docker, Zipkin, Micrometer

Event Booking Microservices Platform  01/2026 – 02/2026

Description: Implemented full system observability with Zipkin and Micrometer, deploying the entire microservices ecosystem via Docker for consistent orchestration.

Technologies: Java, Spring Boot, Spring Cloud, Kafka, PostgreSQL, Resilience4j, JWT, Google OAuth, Docker, Zipkin, Micrometer.

E-Commerce Microservices Platform  12/2025 – 01/2026

Description: Built a scalable microservices system using Java and Spring Boot following distributed architecture principles, featuring an API Gateway and Service Discovery

Technologies: Java, Spring Boot, Spring Cloud, Spring Data JPA, PostgreSQL, JWT, OpenFeign, Docker, Zipkin, Micrometer.

Education

Bachelor's Degree in Computer Science & Information Technology

Menofia University, Egypt | **GPA: 3.47/4.00 (Very Good)** | 2021 – 2025
